

THE PREMIER TOOL for MSPs has arrived

It's Been Difficult for MSPs

To manage Microsoft 365 tenants is very time and resource intensive. It doesn't scale well and it is error-prone. As it stands, adequate tenant management requires senior technical skills in PowerShell and Graph API, which many technicians don't have.

With MSPMagic, technicians of any level can manage multiple tenants quickly and effectively through a simple control panel interface.

Simplify and Scale

Make more money with less effort. MSPMagic opens new revenue streams through its ability to configure, deploy, automate, monitor, and maintain configuration for multiple tenants.

Upsell your customer base with new capabilities and have more to offer prospective clients.

Revolutionize your Microsoft 365 experience

MSPMagic is the premier tool that will revolutionize the way you deliver **Microsoft 365**.

Enjoy **3 free tenants**
to get you started.
